

Electrification Work

As part of our Railway Upgrade Plan, Network Rail is taking another significant step towards electrification of the Great Western Mainline this Spring between 2nd April and 10th April 2016.

During this period Keynsham and Oldfield Park stations will be closed to passenger services. In order to keep you moving, a comprehensive rail replacement service will be operating and while there will be some increase in journey times, it will still be quicker and easier than travelling by car.

Bath Spa and Bristol Temple Meads stations will be open as normal.
