Journey Planner

The travelwest Big Commuting Challenge starts on 6 June 2016.

- Switching from driving solo to travelling to work by car sharing, using public transport, or a more active journey such as cycling or walking helps reduce traffic congestion and could even get you fitter.
- Record each new journey made (or log working from home days) on the Challenge website or free app and be in with a chance to win one of our prizes.
- You can enter as an individual or team of colleagues, and even set up inter-departmental challenges.
- Whether you work full or part-time, it's the participation rather than frequency or distance of travel that counts, so every single journey logged can help your organisation become best in the West!
